

Pimaflex Air Con Fitting

Pimaflex Air Con Fitting has been invented for easy, clean, and fast installation. Made of brass, the fitting provides all wellknow benefits in regards of strength and temperature.

Compression Fitting for Aircondition Systems

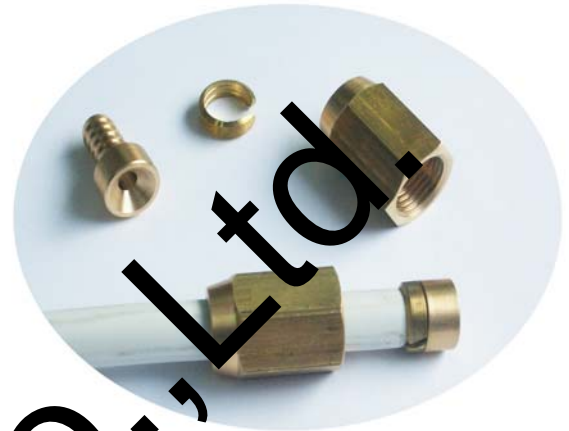

The *Pimaflex multipipe* range of compression fittings is designed to enables all conventional Air Con sizes.

The profile of the fitting is co-ordinated with the plastic material and excellently compensates all forces of the daily operation

Pimaflex multipipe compression fittings press the insert part with clamp ring on to the *Pimaflex multipipe* by tightening the swivel nut. The compression fitting can be released again; whereas the insert part and clamp ring remain permanently connected to the pipe.

The specially designed insert part fits exactly to the service valve of the aircondition and enables a permanently tight connection without any additional sealing.

Pimaflex multipipe compression fittings are permanently tight as confirmed by test reports and certificates.

Easy Fast Save

The Installation of Pimaflex Air Con Fitting

1. Measure to length and cut, if necessary bend the pipe.

2.1 Push the nut over the pipe.
2.2 Push the clamp ring on the pipe.
2.3 Push the fitting body into the pipe.

3. Screw the nut on the air condition unit, and tighten it.

4. Finish
